Allowable Subject Matter

1. Claims 9-15 and 17 are allowed.

Claims 9 and 17 are independent claims.

The following is an examiner's statement of reasons for allowance:

As to claim 9, the present invention from the application discloses an image formation system, which executes additional information in the image data in a format having a trigger information including control operations (fig. 6 in the specification), includes: a controller responsive to detection of the trigger information to execute a plurality of control operations corresponding to the trigger information stored in the memory, wherein one of the control operations includes a transmission operation transmitting print information related to printing of the image data to a destination.

As to claim 17, the present invention from the application discloses an image formation system, which executes additional information in the image data in a format having a trigger information including control operations (fig. 6 in the specification), includes: a controller executing a plurality of predetermined control operations in response to detection of the trigger information, wherein one of the predetermined control operations includes a transmission operation transmitting information related to recording of the image data to a destination.

The closest prior art such as Ikenoue et al. (US Patent No. 5,671,277) discloses the original additional data is automatically transmitted to the management unit. However, Ikenoue,

Art Unit: 2624

including an updated electronic text search, fails to anticipate or render the above underlined limitations from claims 9 and 17 obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
